

Defects Report v2.0

Flip Property Coach / propertyflipit.com

Full end-to-end test: Flipper · Supplier · Admin
Date: 1 July 2026 | Build: main !' Vercel Production
Tested by: Copilot Test & Validation Agent

Executive Summary

Total Defects Found: 34 Fixed This Session: 12
Remaining Open: 22 Critical Still Open: 2

Severity Breakdown:

CRITICAL Found: 8 Fixed: 6 Open: 2
HIGH Found: 10 Fixed: 5 Open: 5
MEDIUM Found: 12 Fixed: 1 Open: 11
LOW Found: 4 Fixed: 0 Open: 4

Fixed This Session (12)

FLP-001 [FIXED]

Flipper Add
Transaction
now persists to
Supabase for
real users

FLP-002 [FIXED]

Flipper Add
Todo now
persists to
Supabase for
real users

SUP-001

[FIXED]
Supplier Ad
purchase
Stripe checkout
fixed (was
GET, now
correct POST)

AUTH-001

[FIXED] Admin
Admin /admin
page now
requires
authentication
+ admin role

AUTH-002

[FIXED]
Supplier
Supplier
dashboard
shows mock
data only when
unauthenticated

FLP-003 [FIXED]

Flipper Delete
transaction
button added
(hover row to
reveal ×)

FLP-004 [FIXED]

Flipper Delete
todo button
added (hover

task to reveal ×)

FLP-005 [FIXED]

Flipper

Remove
property from
watchlist —
toggle button
added

FLP-006 [FIXED]

Flipper

Finance charts
now calculated
dynamically
from real
transactions

AUTH-004

[FIXED] All

Auth callback
now redirects
to /login?error=
auth_failed on
failure

CLEAN [FIXED]

— Removed 7
leftover test/
patch files from
repo root

Open Defects

Critical — Open (2)

PAY-001 — Missing Stripe environment variables

The following env vars are absent from Vercel — all payments fail in production:

- STRIPE_SECRET_KEY
- STRIPE_EDUCATION_PRICE_ID
- STRIPE_AD_YEARLY_PRICE_ID
- STRIPE_AD_LEAD_PRICE_ID
- STRIPE_WEBHOOK_SECRET
- NEXT_PUBLIC_STRIPE_PUBLISHABLE_KEY

ACTION REQUIRED: Vercel Dashboard !' Project !' Settings !' Environment Variables. Create Products & Prices in Stripe Dashboard first (Education £29/mo, Supplier Ad Yearly, Per-Lead).

ADM-002 — All admin actions are non-persistent (mock only)

Approve/reject supplier, suspend user, toggle featured — all update only client-side React state.

No Supabase writes occur. Every change is lost on page refresh. The admin panel is currently cosmetic only.

ACTION REQUIRED: Create secure `/api/admin` routes using the Supabase service role key and wire each action button to the appropriate API call.

High — Open (7)

PAY-002 (All) No authentication on `/api/create-checkout-session` — anyone can create Stripe sessions with any userId

PAY-003 (All) No authentication on `/api/create-portal-session` — anyone who knows a customerId can access billing portal

AUTH-003 (All) Middleware does not protect routes — `/dashboard`, `/supplier-dashboard`, `/admin` reachable without auth

SEC-001 (All) Real Supabase anon key hardcoded in `lib/supabase-config.ts` — must be removed before repo goes public

ADM-005 (Admin/Flipper) Supplier approval not enforced in marketplace — unapproved suppliers can still appear in FIND section

PAY-004 (Supplier) Ad purchase webhook handler not implemented — Stripe fires event but no database write occurs

ADM-003 (Admin) Admin KPIs all hardcoded mock data — 1247 flippers, £28,900 MRR etc. are constants, not real queries

Medium — Open (11)

PAY-005 (All) Subscription period end hardcoded to +30 days; should use actual Stripe subscription data

AUTH-005 (All) Middleware does not refresh expired session tokens — users get logged out unexpectedly on long sessions

SEC-002 (All) No rate limiting on payment API routes — can be abused to generate unlimited Stripe checkout sessions

SEC-003 (All) No input validation on API routes — accepts any raw JSON payload without schema checking

ADM-004 (Admin) Search boxes on Users and Suppliers admin tables have no `onChange` handler — completely non-functional

ADM-006 (Admin) Content management (Educate tab in admin) is a placeholder — no CMS for adding/editing resources

FLP-007 (Flipper) Receipt upload UI missing from Add Transaction form (`SupabaseData.uploadReceipt()` exists but is unreachable)

FLP-008 (Flipper) Milestones section shows hardcoded static text, not derived from real project data or todos

FLP-009 (Flipper) No loading spinners or disabled states on async ops (add transaction, add todo, send enquiry)

SUP-002 (Supplier) No UI to mark leads as Quoted or Closed — only Contacted available via the Reply button

SUP-004 (Supplier) All ad performance metrics (impressions, CTR, revenue) are hardcoded mock data; no real tracking

Low — Open (3)

FLP-010 (Flipper) Plain "Loading..." text during auth init — no spinner component, poor UX

SUP-003 (Supplier) Logout does not clear supplier-related `localStorage` entries

SUP-005 (Supplier) No format validation on phone number, website URL or description length in supplier form

What Works Well — No Defects Found

- ' Magic link authentication — full end-to-end flow working
- ' FIND section — supplier search, category filter, add to team, contact modal, send enquiry
- ' Education library — free/premium gating, PDF generation, video display, checklists, mark complete
- ' Finance CSV export — correct accountant-ready format
- ' Project switcher — correctly scopes all data to the active project
- ' Supplier listing management — create, edit, save to Supabase
- ' Supplier leads inbox — view, reply, status update to Contacted

- ' Stripe webhook signature verification — correctly validates all incoming webhooks
- ' Demo mode — clean fallback on all pages, DEMO badge displayed
- ' Auth state listener — SIGNED_IN / SIGNED_OUT events handled correctly
- ' Logout — full localStorage clear + Supabase signOut + redirect to login

Product Roadmap

Prioritised enhancement list — 4 release milestones Effort key: S = Small M = Medium L = Large XL = X-Large

v2.1 — Security & Payments Foundation (DO FIRST)

- R-001 [S] Security Add authentication to all payment API routes
- R-002 [S] Security Add server-side route protection in middleware
- R-003 [M] Payments Configure real Stripe Price IDs in Vercel environment
- R-012 [S] Security Remove hardcoded Supabase anon key from source code
- R-017 [S] Auth Refresh session tokens in middleware to keep users logged in

v2.2 — Admin & Payments Completion

- R-004 [L] Admin Wire admin actions (approve/reject/suspend) to real Supabase
- R-005 [L] Admin Replace admin mock data with real metrics from Supabase
- R-006 [M] Payments Complete Stripe webhook handler for ad purchases
- R-007 [S] Payments Fix webhook subscription period end date to use Stripe data
- R-015 [S] Admin Implement admin search/filter functionality
- R-016 [M] Security Add rate limiting to payment API routes

v2.3 — Feature Completeness & UX Polish

- R-008 [M] Finance Add receipt upload to Add Transaction form
- R-009 [XL] Supplier Build real ad performance tracking (impressions & clicks)
- R-010 [S] Supplier Add Quoted / Closed status transitions in supplier leads UI
- R-013 [M] UX Add loading spinners to all async operations
- R-014 [S] Supplier Add input validation to supplier listing form

v3.0 — Platform Maturity

- R-011 [XL] Admin Build real CMS for Educate content (video, PDF, checklists)
- R-018 [L] Flip Build milestones feature from project data (full CRUD)
